Cover Gratings from EHA: Non-Slip, adaptable, hygienic.

Cover Gratings from EHA

Simply the right choice

Simply universal

EHA cover gratings are ideal for all swimming pools. The combination of soft plastic profiles, glass fibre reinforced polyester and stainless steel (V4A) is suitable for conventional swimming pools, leisure pools and all types of medicinal baths.

Simply practical

EHA cover gratings have a soft, non-slip upper surface. The material is shatterproof and UV-resistant. On the underside, the profiles are welded to plastic-coated, glass fibre reinforced polyester rods to form an effective supporting structure.

Simply versatile

EHA cover gratings can be adapted to suit any shape of pool. They are available in different designs to match all shapes of overflow channels – round, angular, oval and S-shaped channels. Suitable corner pieces are manufactured for all shapes. For this purpose, the gratings are bolted to 1 mm thick, suitably cut stainless steel plates. Further accessories include end pieces and connectors. The combination of accessories and cover gratings makes sure that the gratings always sit firmly in the channels.

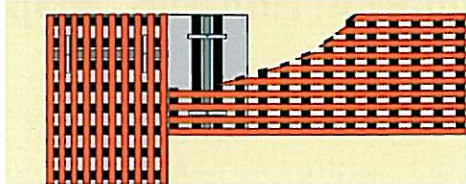

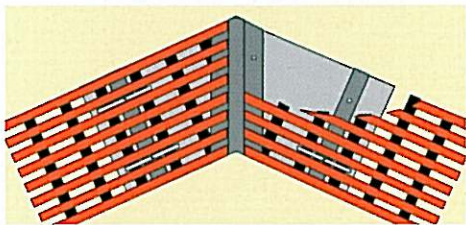

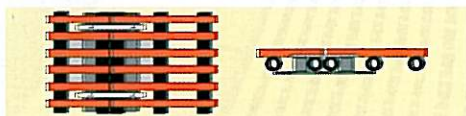

Simply good

EHA cover gratings run parallel to the pool edge. Their upper surface is provided with special safety profiles. EHA cover gratings not only have excellent non-slip properties, but also provide optimum drainage. For cleaning the overflow channels, the gratings can be rolled up in no time.

Simply great value

EHA cover gratings are robust and long-lasting; they can be easily cleaned using standard cleaning agents and appliances. The material is non-porous, colourfast and resistant to chemicals. The gratings are treated with an antibacterial, fungicidal agent to ensure excellent hygienic conditions in swimming pools.

Product Group 11

EHA Cover Gratings

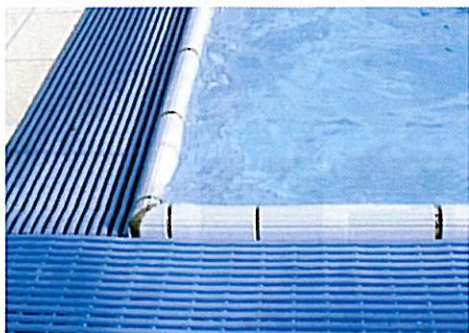

Technical Data

Widths:	up to 100 cm
Roll lengths:	up to 20 m
Hardness:	approx. 90 Shore
Colours:	eleven standard colours
Temperature resistance:	- 50 °C to +60 °C
Total height:	standard height 23 mm*
Profile thickness:	7.5 mm
Profile width:	9.0 mm
Gap width:	7.0 mm
Weight:	approx. 12.5 kg/m ²

EHA Cover Gratings are tested for non-slip properties:

They meet the criteria of Classification Group C to *GUV 26.17/DIN E 51097*.

* Further heights: 20, 25, 27, 30, 35 mm.
